

Ordinarily Available Inclusive Provision

Peterborough City Council

Provision that the local authority expects to be made available for Children and Young People with Special Educational Needs and/or Disabilities (SEND) in all educational settings.

KS	Key stage	VI	Vision Impairment

Introduction

Our Peterborough City Council Ordinarily Available Inclusive Provision (OAIP) has been co-produced and outlines examples of the provision and approaches that the local area has agreed should be available for children/ young people with Special Educational Needs and / or Disabilities (SEND) in all educational settings. This is inclusive of schools including Reception through to colleges. Other education provisions may wish to reference this document, including alternative provision and Early Years settings. This document will be a key SEND reference document; implementing strategies and practices outlined in the document will be seen as the first step for any setting providing an effective graduated response to supporting a child or young person's SEND needs. The term 'Ordinarily Available Practice' features in the SEND Code of Practice (2015).

All the ordinarily available inclusive provision described in this document reflect the SEND Code of Practice (2015) under the four categories; however, it should be used as 'needs led' and is not dependent upon any formal diagnosis. It is recognised that each child/ young person is an individual, with their own strengths and areas for development therefore not every intervention or strategy detailed within the guide will be necessary, or appropriate, for every child/ young person. The child/ young person's age and maturity must also be considered, with strategies and approaches reviewed. It is anticipated that high quality teaching methods will effectively support the teaching and learning of most children/ young people. Although the provision listed here should be available, this guide is not exhaustive, and it is not a checklist. It describes some examples of inclusive practice, reasonable adjustments and high-quality teaching strategies and provision expected across the whole setting community. Research indicates that small changes at the early stages of the graduated approach (Assess, Plan, Do and Review), when a child/young person's needs are first identified, will support in removing barriers to learning and enable the child/young person to be successful in their education setting. It is our hope that this guide will support more inclusive learning environments and experiences for all children/ young people across the city.

This OAIP can be used in many ways, for example:

- as a reference for Special Educational Needs Coordinators (SENCOs) and teachers to ensure the right support is available at the right time
- to support discussions with children/young people and families in working together to identify the most helpful approaches
- in meetings with other professionals such as outside agencies to discuss current approaches
- for governors to understand what can be seen as ordinarily available and 'above and beyond' for children/young people
- for support staff and other setting colleagues

Thank you to everyone who has been involved in the development of our OAIP through co-production with SENCOs, parents/ carers through Family Voice, as well as colleagues across the Local Authority Children's Services and Health. It is also linked with work published by other Local Authorities (Portsmouth, Buckinghamshire, Bristol, Somerset, East Riding, Hertfordshire, and Leicestershire).

For further details of services and support please visit Peterborough City Council's Local Offer [SEND Information Hub \(Local Offer\) | Peterborough City Council](#)

Section 1: Expectations of all Educational Settings

All settings must apply the principles underpinning the [SEND Code of Practice 0 to 25 years](#) and have regard to the [Equality Act 2010, Children and Families Act 2014](#) and the [SEND regulations 2014](#).

The key principles of the SEND Code of Practice should be applied in all settings and throughout the child/ young person's learning journey.

- The views, wishes and feelings of the child/ young person and parent carers.
- The importance of the child/ young person and parents, participating as fully as possible in decisions, and being provided with the information and support necessary to enable participation in those decisions.
- The early identification of child/ young person's needs and intervention to support them.
- The need to support the child/ young person and the child/ young person's parents to facilitate the development of the child/ young person and to help them achieve the best possible educational and other outcomes, preparing them effectively for adulthood.
- Collaboration between education, health, and social care services.
- High quality provision to meet the needs of the child/young person with a focus on inclusive practice and removing barriers to learning.

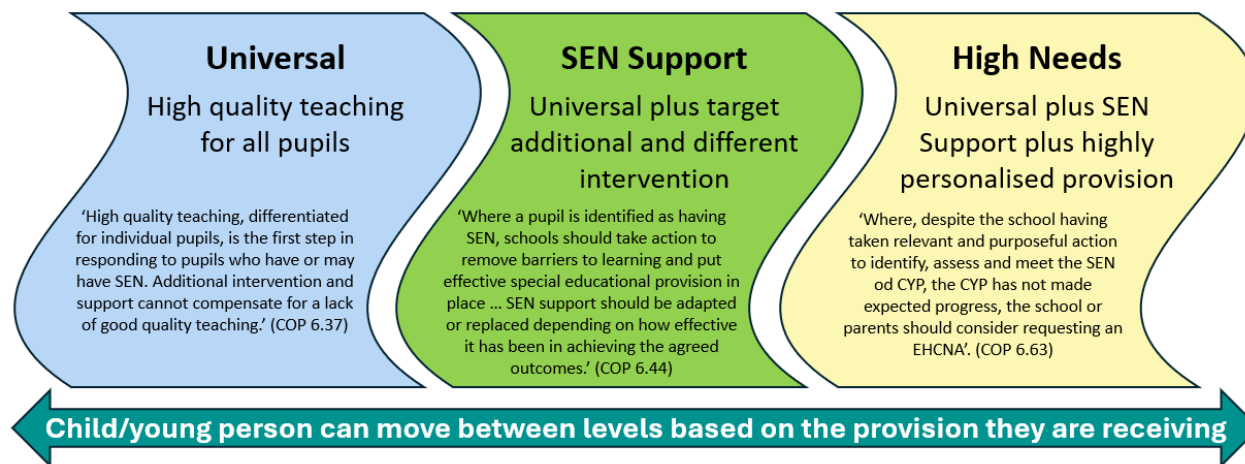

What is the Graduated Response

The SEND Code of Practice outlines the requirement for educational settings to have arrangements in place to support children and young people with SEN. This includes a "clear approach to identifying and responding to SEN" [SEND Code of Practice \(CoP\), Chapter 6](#).

The importance of early identification of the needs of child/ young person so that appropriate provision can be put in place at the earliest opportunity is central to the SEND Code of Practice. Educational settings should offer an inclusive approach to learning and teaching, with high quality teaching which is adapted for an individual child/ young person. This approach should be embedded in their provision in all subject areas, and at all levels, and support the teaching of all children/ young people, including those with SEN as per the [Teacher Standards 2021](#).

Where a pupil is identified as having SEN, schools should take action to remove barriers to learning and put effective special educational provision in place. This support should take the form of a four-part cycle where earlier decision and actions are revisited, revised, and refined with a growing understanding of the pupil's needs and what supports them to make good progress and secure good outcomes. This is known as the graduated response, (CoP 6.44). Where a pupil continues to make less than expected progress, despite evidence-based support and interventions that are matched to the pupil's needs, the school should consider involving specialists, which they can do at any point to advise them on identification of SEN and effective support and interventions. A school should always involve a specialist when a pupil continues to make little or no progress or where they continue to work at levels substantially below those expected of pupils of a similar age despite evidence-based SEN support delivered by appropriately trained staff. The pupil's parents should always be involved in the decision to involve specialists, (CoP 6.59).

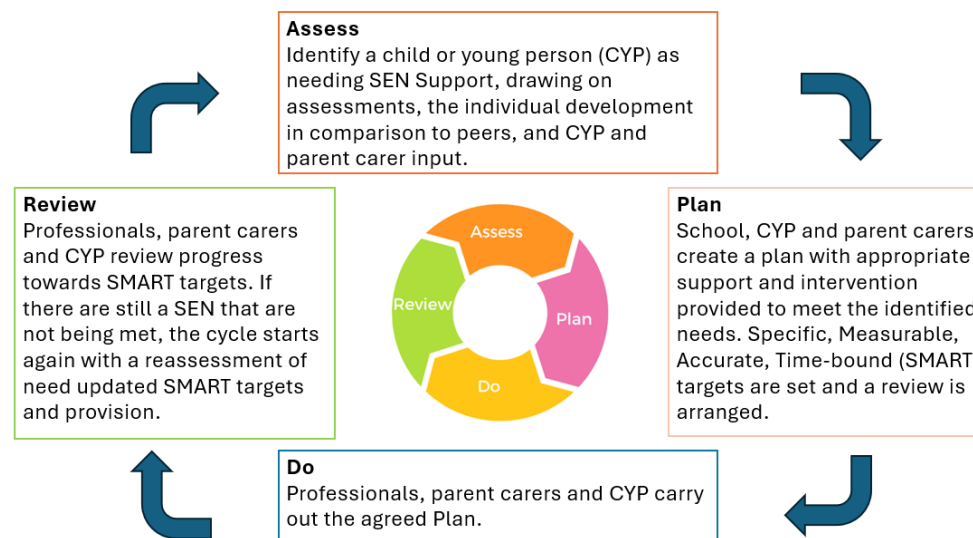

For most children or young people where there is a concern, the school should work through a graduated response ‘to ensure the relevant and purposeful action to identify, assess and meet the special educational needs of the child or young person has been taken’ (CoP 9.14) and as per the Code of Practice 6.44. ‘In a very small minority of cases of children or young people may demonstrate such significant difficulties that a school or other provider may consider it impossible or inappropriate to carry out its full chosen assessment procedure.’ (CoP 9.3)

What is the Assess, Plan, Do, Review (APDR) cycle?

The graduated response is ‘a four-part cycle through which earlier decisions and actions are revisited, refined, and revised with a growing understanding of the pupil’s needs and of what supports the pupil in making good progress and securing good outcomes’ Code of Practice 6.44.

A regular cycle of APDR is used to ensure that the child/ young person with SEND is making progress. This should be monitored at every stage of the graduated response process. A wide range of assessment strategies and tools can be used to ensure a thorough understanding of a child/ young person’s strengths and areas for development. The child/ young person will have regular opportunities to evaluate their own performance, and self-assessment is routinely used to set individual targets. The impact of interventions is critically evaluated. Alternative approaches are explored to establish whether they may result in better outcomes for the child/ young person.

Funding

This guidance is a summary of the DfE guidance published September 2024 and refers to the SEND code of practice which can be found here.

[Local authorities: pre-16 schools funding - GOV.UK \(www.gov.uk\)](https://www.gov.uk/guidance/local-authorities-pre-16-schools-funding)

[16 to 19 education: funding guidance - GOV.UK](https://www.gov.uk/guidance/16-to-19-education-funding-guidance)

[SEND Code of Practice January 2015.pdf \(publishing.service.gov.uk\)](https://publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/312521/SEND_Code_of_Practice_January_2015.pdf)

Our expectation is that through high quality teaching and the implementation of a graduated approach, the needs of the majority of our children/ young people can be met from a school's core and notional budgets. There are three sources of funding available to schools to support children/ young people with special educational needs, described as Elements 1, 2 and 3. The Local Authority calculate the amount of the notional budget using local mainstream schools funding formula factors such as free school meals, social deprivation factors, English as an Additional Language (EAL), attainment levels etc.

Element 1 – Core Education Funding	All schools are provided with what is known as core education funding. This is the individual funding that is provided to each school to provide the standard offer of teaching and learning for all children/ young people on the school roll. The Age Weighted Pupil Unit (AWPU) pays for the basic costs for every child/ young person in the school regardless of any SEND. It usually covers staffing and premises costs. All children/ young people should be able to access high quality teaching and we know from research that this improves outcomes for all children/ young people but also, high quality teaching, adapted for individual pupils, is the first step in responding to pupils who have or may have SEN.
Element 2 - SEND notional budget	Mainstream maintained schools and academies are notified each year of a clearly identified SEND notional budget, within their overall budget allocation, towards the costs of fulfilling their duty to use their 'best endeavours' to secure special educational provision for their pupils with SEN. This is funding of up to £6000 per child/young person with SEND (both EHCP and SEND support). Schools are expected to meet the special educational needs of the majority of children/ young people from this budget.
Element 3 – High Needs Block	The High Needs Block (sometimes referred to as "top up funding"). This is the money paid by the Local Authority (maintained)/ Education and Skills Funding Agency (academies), in addition to the element 1 and element 2 funding to top up the support within the school to meet the funding needed for individual children/ young people with an EHCP.

Schools will need to carefully consider how the funding should be best used to meet the child/young person's outcomes instead of routinely allocating a 1:1 Teaching Assistant to them. This may include training for staff working with the child/young person, educational resources that will enhance the accessibility of the curriculum and/or more specialised teaching support for group interventions. There may be some cases where there is a high level of physical need, attachment and/or safeguarding need which will require higher levels of staffing.

The expectations of mainstream schools in relation to the use of the Notional SEN budget are to:

- meet the costs of special educational provision for children/ young people identified as on SEN Support in accordance with the SEND Code of Practice; and
- contribute towards the costs of special educational provision for children/ young people with high needs (most of whom have education, health, and care (EHC) plans), up to the high needs cost threshold set by the regulations (currently £6,000 per pupil per annum).

Government guidance says schools should provide up to the first £6,000 of additional or different support for those children and young people who need it, including those with an Education, Health, and Care Plan. This does not mean that the school will spend £6000 on every child/ young person with SEND, as most such pupils' support will cost less than that. Nor is the notional SEN budget intended to provide a specific amount per child/ young person for those with lower additional support costs. The Local Authority may make reasonable assumptions about what those costs might be, for the purpose of ensuring that their schools' notional SEN budget calculation is realistic. This is referred to as the 'national threshold' and this amount is set by the Department for Education (DfE).

There is an expectation (DfE and SEND Code of Practice 0-25) that the SENCO is aware of their school's notional SEN budget and to be actively engaged with the senior leaders of the school in deciding what to spend SEN support and provision on. It is for the SENCO, Headteacher and governing body to establish a clear picture of the resources that are available to the school, and to consider their strategic approach to meeting SEN in the context of the total resources available to them, including any resources targeted at particular groups, such as the pupil premium. The additional resources included below on whole school costed provision plans and individual pupil costed provision plans support this strategic approach to SEN funding.

Additional resources available to support funding calculations include:

Strategic planning and monitoring of SEN funding	When to use
NASEN Whole school costed-provision-map.xlsx	Prior to new academic year to plan provision for child/ young person across the whole school based on identified needs. Prior to new academic year to plan SEN expenditure based on information within whole school the costed provision map.
Individual Pupil planning and tracking of SEN Funding	When to use
Individual pupil costed-provision-map-template .xlsx	When making a request for an Education, Health, and Care Needs Assessment (EHCNA) to evidence where the school contribution towards the costs of special educational provision for a child/ young person with high needs is above the notional SEN budget of £6,000 per pupil per annum. When schools are struggling to meet the needs of a pupil with an EHCP and evidencing where the school contribution towards the costs of special educational provision for pupils with high needs is above the notional SEN budget of £6,000 per pupil per annum and exceeds the additional element 3 funding.

Expectations for Governors, Headteachers, SENCOs and Teachers

These expectations are drawn from the [SEND Code of Practice 2015](#), [Headteacher Standards 2020](#), [Teachers' Standards 2021](#), [Maintained schools governance guide 2024](#), [Academy trust governance guide](#), [Children and Families Act 2014 \(legislation.gov.uk\)](#), [Equality Act 2010 \(legislation.gov.uk\)](#), [UN Convention on the Rights of the Child - UNICEF UK](#) and the [UN Convention on the Rights of Persons with Disabilities: initial report on how the UK is implementing it - GOV.UK](#)

Governors must

- Be aware of their legal duties in relation to children and young people with SEN as per The SEND Code of Practice and Children and Families Act 2014 and have a good working understanding of these documents and particularly their duty around 'best endeavours'.
- The governing body have the legal duty to focus on the school's systems and processes for supporting children/young people with SEN rather than provision for individual children/young people.
- Ensure all school policies meet the Equality Act and do not disadvantage pupils with SEND. Help to review the school's policy on provision for children/young people with SEN and the school's approach to meeting the needs of those with SEN.
- Ensure that there is a suitably qualified teacher designated as Special Educational Needs Coordinator (SENCO) and holds the National Award for Special Educational Needs Coordination or the National Professional Qualification for SENCOs or be working towards this within three years of becoming a SENCO.
- Ensure that SEN duties are undertaken effectively across the organisation including but not limited to: identification of needs, responding to SEN, a broad and balanced curriculum, record keeping of SEN provision and engagement and participation for all children/young people.
- Ensure the schools notional SEN budget is appropriately allocated to support children/young people with SEN.
- Have a member of the board with specific oversight for the school's SEN arrangements.
- Build a good working relationship with the SENCO and meet with the SENCO on a regular basis.
- Ensure that the school website publishes the school's SEN offer and link to Peterborough's SEND local offer.

Headteachers must

- Ensure the school holds ambitious expectations for all children and young people with SEN.
- Establish and sustain culture and practices that enable children/young people to access the curriculum and learn effectively.
- Ensure the school works effectively in partnership with parent carers and professionals, to identify the additional needs and SEN of children/young people, providing support and adaptation where appropriate.
- Ensure the school fulfils its statutory duties with regard to the SEND Code of Practice 2015.
- Promote positive and respectful relationships across the school community and a safe, orderly, and inclusive environment.
- Ensure that responsibilities are met under the Equality Act (2010) with regard to reasonable adjustments and access arrangements.
- Ensure a suitably qualified and experienced teacher is designated as SENCO and allowed sufficient non-teaching time to carry out their duties.
- Have a clear approach to early identification of SEN and response to identified needs.
- Ensure School SEN Information Report is produced and published online in accordance with section 69 of the Children and Families Act 2014.
- Ensure the SENCO is able to support and advise you and the governing body in determining strategic development of SEN policy and provision – this is achieved most effectively by the SENCO being a member of the SLT.
- Ensure the SENCO and governors are aware of the SEN budget and how it is being used and value for money is secured.

SENCOs must

- Be able to support and advise the Headteacher and governing body in determining the strategic development of SEN policy/provision in the school.
- Have day-to-day responsibility for the operation of the SEN policy and specific support to children and young people with SEN, including those with an EHCP.
- Be a qualified teacher and hold the National Award for Special Educational Needs Coordination or the National Professional Qualification for SENCOs or be working towards this within three years of becoming a SENCO.
- Provide professional guidance to colleagues and work closely with staff, parent carers and other agencies.
- Be aware of the Local Offer provision and provide support to families to ensure children/young people with SEN receive appropriate support.
- Ensure your school keeps its record of children/young people with SEN up to date.
- Compile an annual report for school governors about the provision for, and progress of, children/young people with SEN.
- Have knowledge of the SEN budget and how it is used.
- Advise on the graduated approach to providing SEN support.
- Liaise with potential next providers of education to ensure a children/young people and their parent carers are informed about options and a smooth transition is planned.
- Work with the Headteacher and SEN Governor to ensure that the school meets requirements under the Equality Act 2010 with regard to reasonable adjustments and access arrangements.

Teaching staff must

- Be aware that teachers are responsible and accountable for the progress and development of the children and young people in their class, including where child/young person access support from teaching assistants, specialist staff or are receiving bespoke provision.
- Have a clear understanding of the needs of all children/young people, including those with SEN, and be able to use and evaluate distinctive teaching approaches to engage and support them.
- Set goals that stretch and challenge children/young people of all backgrounds, abilities, and dispositions.
- Have knowledge of appropriate baseline assessments and tracking tools.
- Have a secure understanding of how a range of factors can inhibit children/young people's ability to learn and how best to overcome these.
- Manage classes effectively, using approaches which are appropriate to children/young people's needs in order to involve and motivate them.
- Remain responsible for working with children/young people on a daily basis. Where interventions involve time away from the main class teacher, the teacher retains responsibility for the child/young person.
- Work closely with teaching assistants to inform the planning and to assess the impact of interventions and link them to classroom teaching.
- Work closely with parent carers and children/young people to identify strengths, barriers, and support strategies.
- Work closely with outside agencies and professionals to support the child/young person when appropriate.
- Follow a graduated response to identifying barriers and implementing support strategies.

Expectations for whole school inclusion

These expectations are drawn from the [SEND Code of Practice 2015](#), and [EEF SEND in Mainstream Guidance Report 2020](#). They outline the expectations that will promote inclusion for all children and young people, including those with SEN, which are not detailed within the Broad Areas of Need section of this document. They are the key areas that collectively define the factors necessary for successful Special Educational Needs and/or Disabilities (SEND) provision at the setting-based stages of the graduated approach.

Assessment	<ul style="list-style-type: none"> – Practitioners ensure that formative assessment and feedback are a feature of lessons. Assessment is used to reflect on pupil progress, and to identify, and act upon, possible barriers to learning. – All schools should have a clear approach to early identification of SEN. – Schools should use a holistic approach to assessment including, but not limited to, formative assessment, observation, checklists, diagnostic tools and child/ young person and parent carer voice. – A regular cycle of Assess, Plan, Do, Review should be used to ensure that child/ young person with SEN are making progress. – Expertise is in place to manage reasonable examination arrangements (access arrangements) for tests and national tests and public examinations.
Partnership with child/young person and parent carers	<ul style="list-style-type: none"> – Parent/carers and child/young person are supported to engage in decision making and to share their views. – School support plans are used to record information relating to identified SEND interventions in place over time. Parents carers and child/young person are fully involved in setting and reviewing targets and outcomes. – Child/ young person is helped to value their progress and achievements and to recognise and understand their own barriers to learning. – Parents/carers and schools communicate regularly to exchange information about the child/ young person. – There is a shared understanding with parents/carers about which professionals and services are working with children/ young people and their families. – Schools work closely with parents/carers and parent advocacy groups (SENDIASS, Family Voice, Little Miracles) to create a shared understanding of needs and implement effective approaches to ensure outcomes are met. – The school SEN Information Report is co-produced with parent carers and published on the school website. – Parent carers are signposted to support available through The Local Offer.
Positive and supportive environment for all CYP	<ul style="list-style-type: none"> – Promote positive relationships, positive role models, active engagement, and wellbeing for all children/ young people. – There is a calm and purposeful climate for learning where children/ young people feel safe and their contributions are valued . – Language used in the classroom demonstrates unconditional positive regard for learners (e.g., relational / restorative approaches). – Peer awareness and sensitivity towards difference (including SEND) are raised at a whole setting level. Work is done with classes and groups regarding specific needs or conditions as appropriate. – Expectations of behaviour are high and consistent. Child/ young person are routinely taught what good behaviour looks like and supported to reach these expectations through modelled behaviours and an inclusive curriculum. Negative attitudes, beliefs and perceptions towards individuals and groups are challenged, in the classroom, the wider school and society.

The Physical and Sensory Environment	<ul style="list-style-type: none"> – The physical accessibility of the building and individual learning spaces is assessed. The accessibility plan is on the setting’s website and ‘reasonable adjustments’ and adaptations are made to meet the needs of the child/ young person. – Extra-curricular activities and educational visits are planned to fully include child/ young person with SEND (in line with the Equalities Act 2010), including those with SEMH and physical disabilities. ‘Reasonable adjustments’ are made. – Practitioners are aware of sensory needs and issues that may impact on child/ young person.
Teaching and learning	<ul style="list-style-type: none"> – Practitioners are aware of the additional needs of their learners, understand the nature and impact of these and how to respond to them. Planning incorporates more detailed specialist advice. – Practitioners adapt to provide suitable learning challenges and cater for different learning needs and styles. – Practitioners ensure that learners have opportunities to work in different ways e.g. independently, in a variety of small groups and / or in pairs. – Use of steps-to-success or similar, to promote independence, scaffold, and support child/ young person. – Practitioners ensure that collaborative learning and peer support is a feature of learning. – Use of additional adults is planned to maximise their impact on learning. – Strategies are used to build and maintain positive relationships across the whole setting community (e.g. relational / restorative approaches). – Specific resources and strategies are provided to overcome potential barriers to learning e.g. concrete apparatus, increased use of ICT resources.
Staff skills and CPD	<ul style="list-style-type: none"> – There is a plan for on-going Continuing Professional Development (CPD) in relation to understanding and meeting the needs of children/ young people. – Staff collaborate and have effective links with other relevant outside agencies and specialists for support, training, and supervision. – All practitioners, including Teaching Assistants, (TA) make a positive contribution to learner progress. The Education Endowment Foundation (EEF) guide might be useful for TA CPD Making Best Use of Teaching Assistants EEF (educationendowmentfoundation.org.uk).
Transition and transfer	<ul style="list-style-type: none"> – Staff are aware of those who will need additional support for all or most transitions and plan for these routine and life transitions when required. – Procedures are in place for ensuring smooth progression through settings, particularly during all transition phases, including on entry and exit. – Plans are made for unstructured times: safe spaces available; structured alternatives such as games club, use of library for vulnerable child/ young person. – Child/ young person and parent carers participate in decisions around transition and transfer. – On transition, there should be timely sharing of key information and any available records.

Supporting children/young people with complex medical needs

The document [Supporting pupils at school with medical conditions](https://publishing.service.gov.uk) (publishing.service.gov.uk) outlines national guidance on meeting medical needs within school. The [Children and Families Act 2014](#) and the [Equalities Act 2010](#), place legal duties on schools to support children/young people with medical conditions. This support might be specified in a [healthcare plan](#) which is written by the school with the help of the child/ young person's parent carers and relevant medical professionals. It is in place to clearly outline how the child/ young person's medical needs will be supported while they are attending the setting including an escalation plan for any deterioration in their health condition. If medical procedures such as monitoring medical readings or providing health treatments are required while the child/ young person is within the setting, then relevant healthcare professionals will provide training to identified staff within the setting to ensure that the child/ young person's needs can be safely met.

Medical needs and disability

A child/ young person with a medical condition that is physical or mental and that has a 'long term and substantial adverse effect on their ability to carry out day to day activities' may be defined as disabled by the Equality Act 2010. This means they may also be covered under the SEND Code of Practice legislation and should be supported in school through the graduated response. An Education, Health and Care Plan may only be needed for those with the highest level of need.

Medical needs without SEND

A child/ young person may have an isolated medical need and not necessarily have special educational needs or a disability, however they may need enhanced support to ensure they are safe and kept as healthy as possible within the setting. This will usually be provided by the setting making reasonable adjustments which may involve enhanced staffing.

Medical funding and resources for support

Some children and young people (up to their 18th birthday) may have such complex health needs that they cannot be met by the services which are routinely available from GP practices, hospitals or in the community. The [National Framework for Children and Young People's Continuing Care](#) provides guidance for NHS Integrated Care Boards when assessing a child or young person's health care needs. Schools should discuss with the child's healthcare professionals, GP, or social worker if there are health care needs that are more complex than the school can provide under statutory guidance for meeting medical needs in school. A referral can be made by any professional working with the child or young person, who feels there is an identified health need that cannot be met by existing universal or specialist services alone. You can contact the Children's Continuing Care Team by calling them 0330 057 1022 or by emailing cpicb.childrencontinuingcare@nhs.net to request the referral form. For young adults aged 18 years and over the NHS Continuing Healthcare referral process can be found here: [NHS Continuing Healthcare \(CHC\) | CPICB Website](#). The Designated Clinical Officer for SEND also offers advice and signposting for schools supporting children with complex health needs. This includes advice for children who do not have a Peterborough or Cambridgeshire GP. Please e-mail cpicb.send@nhs.net for further details.

Toileting

Some children/ young people, for a variety of medical, emotional, or social reasons, may require toilet training or special arrangements with toileting in their setting/school. Admission policies and practices that require a child to be toilet trained are discriminatory and potentially unlawful; under the Equality Act issues should be dealt with on an individual basis and Settings and Schools must make "reasonable adjustments" accordingly.

Children known to Social Care (Children in Care (CiC), Children Previously in Care (CPiC), children living in a Kinship Care Arrangement and those who have or have had a Social Worker at CiN or CP level over the last 6 years)

Peterborough Virtual School's remit includes promoting the educational outcomes for all children known to social care, enabling our vision of achieving 'aspirational educational outcomes which enable them to live healthy, happy, and fulfilled lives.' Children known to social care will have experienced adversity and trauma and therefore require both educational, situational, and environmental considerations.

It is recognised that children known to social care may have co-occurring SEND needs, that can be supported by this OAIP document and Peterborough Virtual School are in the process of creating a further supporting toolkit to support stakeholders to consider how the child's lived experiences can be supported successfully within their educational setting. Once available, a link will be included in this document.

In the meantime, Peterborough's Virtual School website offers a range information, advice and guidance and best practice for Peterborough's most vulnerable children and young people. The offer, also available on the website, includes but is not limited to intense inclusion and engagement work for some identified CiC children, Requests for Advice and Guidance for all children known to social care and termly Advisory visits.

[Welcome to Peterborough Virtual School – Learn Together page](#)

Quick need checker

The Quick Checker can be used in a learning environment to gauge whether a child/ young person may need further investigation and/or support in one or more broad areas. This can then be used as part of a conversation between class teachers and parent carers at the initial stage of concern (see SEN Graduated Response Flowchart). The Quick Checker is not a diagnostic tool, but it is designed to identify barriers within the four broad areas of SEN.

Quick need checker - cognition and learning

There are concerns about the child or young person's:	Y/N
Lack of progress, even with differentiated high quality first teaching approaches which are targeted to gaps and barriers.	
Performance levels i.e., they are below the level within which most children and young people are expected to work.	
Difficulty acquiring basic literacy skills and knowledge, for example, phonics, reading fluency and reading speed.	
Difficulty acquiring basic maths skills and knowledge, for example, number bonds, applying and remembering maths learning.	
Retaining and recalling information - in the short and/or long term.	
Difficulty in dealing with abstract ideas, applying from prior learning and problem solving.	
Slow processing—they take longer to work through problems and tasks but can do with longer time.	
Poor independent learning skills such as the ability to focus, listen, organise themselves, sequence, or sustain attention on a task.	
High level of dependence on adult support.	
Lack of confidence, avoidance of tasks and reluctance to take risks.	

Quick need checker - communication and interaction

There are concerns about the child or young person's:

Y/N

Expressive language

Ability to use language to communicate with others, for example, finding the words they need or putting them in a cohesive sentence.

Difficulty with speech sound or articulation skills.

Difficulty using speech sounds accurately.

Ability to use and express their ideas with clearly voiced and fluent speech, for example, stammering.

Receptive language

Ability to understand and process language including auditory memory and vocabulary, for example, remembering length of sentence.

Ability to understand a sentence as a whole, for example, may cue into certain words.

Attention and/or listening skills—their ability to engage successfully with language.

Difficulty with sequencing words or events to tell a story.

Social and non-verbal communication

Social communication, difficulty with social understanding and interaction, for example, building and maintaining friendships.

Rigidity of thought, for example, ability to manage changes in routine, literal understanding, and use of language.

Difficulties with non-verbal communication such as eye contact, interpreting facial expression, non-verbal cues and prompts, body language.

Poor awareness of needs of listener and what is appropriate, for example, not giving context, detail, speed of speech, tone of voice.

Poor conversation skills, not taking turns, taking on board other's ideas, following another's topic of conversation, using a monologue, dominating the conversation.

Quick need checker –Social, Emotional and Mental Health

There are concerns about the child or young person's:	Y/N
Ability to plan, attend, organise, regulate themselves and manage change.	
Level of hyper vigilance and their disproportionate 'fight, flight, freeze' response.	
Attendance at school. (Refer to DfE Guidance 'Working together to Improve School Attendance')	
Maintaining healthy peer relationships and friendships.	
Behaviour at home that may not be seen at school.	
Engagement with the curriculum.	
Changes in demeanour and/or appearance.	
Unpredictability of behaviour with lack of obvious triggers.	
Low confidence and/or self-esteem.	
Failure to make anticipated progress across many areas of the curriculum.	

Quick need checker – sensory and physical: physical needs

There are concerns about the child or young person's:	Y/N
Physical skills/needs are affecting their learning and/or access to the curriculum.	
Physical skills/needs effect their stamina and endurance levels impacting on quantity and quality of work achieved (such as fatigue).	
Physical skills/needs affecting their ability to access the school site/facilities.	
Physical skills/needs requiring them to have assistance with personal care/moving and handling.	
Physical skills/needs requiring additional support/equipment to evacuate the building safely in the case of an emergency.	
Physical skills/needs impacting on their ability to complete activities of daily living such as toileting, dressing, use of cutlery, use of scissors, writing etc.	

Quick need checker – sensory and physical: Vision impairment

There are concerns which may be related to vision loss about the child or young person's:	Y/N
Holding printed resources and/or objects very closely or at an unusual angle.	
Failing to respond to non-verbal instructions.	
Losing their place when reading, skipping lines, and struggling to find text on a page.	
Having difficulty accessing, or not paying attention to board work.	
Struggling in P.E., especially demonstrating poor spatial awareness.	
Appearing isolated in the playground.	
Having difficulty interpreting facial expressions, social cues and can get too close.	
Being withdrawn or demonstrating behavioural issues.	
Tripping over, or having difficulty with steps/stairs/uneven ground.	
Has difficulty orientating in an unfamiliar environment.	

Quick need checker – sensory and physical: Deaf

There are concerns which may be related to hearing impairment about the child or young person's:	Y/N
Having noticeable delays or gaps in attention and listening, play, communication and understanding spoken interaction.	
Showing some of the following: poor speech intelligibility, difficulty with recognising and responding to phonics, limited vocabulary both receptive and expressive, and immature grammatical structures in spoken language.	
Being distractible in class, having poor listening skills in a busy environment, and asking you to repeat often.	
Having low levels of confidence.	
Voice varies considerably, which may be due to group size, distance from board/teacher, reverberant rooms, or poor light levels.	
Being dependent on visual cues from their teacher or peers.	
Having difficulty in responding to questions, instructions, starting work after teacher input or discussion, recalling information, social and academic interaction with peers.	

Section 2: Support for Broad Areas of Need

This section is divided into the four areas of need set out in the [SEND Code of Practice](#).

Many children/ young people may have needs across more than one category and several areas may need to be consulted for the same child/ young person, certain conditions may not fall neatly into one area of need. When reviewing and managing special educational provision the four broad areas of need may be helpful as a guide to ensure you can provide support across these areas.

Children/ young people are individuals and have their own pattern of strengths and areas for development and their age and maturity must be considered. It is important to note that not every intervention or strategy outlined will be appropriate for every child/ young person. The most helpful strategies should be agreed with the child/ young person and parents/ carers then reviewed and adapted as the child/ young person matures. Although there is a wealth of strategies and suggestions this is not an exhaustive list of the barriers a child/young person may face or provision available.

Each section is divided into a universal offer and a targeted offer. The targeted offer assessment tools may incur an additional cost.

Cognition and Learning

‘Support for learning difficulties may be required when children and young people learn at a slower pace than their peers, even with appropriate differentiation. Learning difficulties cover a wide range of needs, including moderate learning difficulties (MLD), severe learning difficulties (SLD), where children and young people are likely to need support in all areas of the curriculum and associated difficulties with mobility and communication, through to profound and multiple learning difficulties (PMLD), where children and young people are likely to have severe and complex learning difficulties as well as a physical disability or sensory impairment. Specific learning difficulties (SpLD), affect one or more specific aspects of learning. This encompasses a range of conditions such as dyslexia, dyscalculia, and dyspraxia.’ SEND Code of Practice, 6.30 and 6.31.

Cognition refers to the thinking skills and thought processes that a child / young person has acquired through their prior experience. Learning needs are on a continuum and can vary across subjects and situations. Children/ young people with learning needs may learn at a slower pace than their peers despite appropriate adaptation. Learning difficulties can be general or specific and related to one or more areas of the curriculum. Difficulties may be short-term in one or more areas or severe and long term.

General approaches and strategies for Cognition and Learning

- The view of the child/young person around how they feel sought in a child friendly way.
- Close home/setting/parent carer links so staff are aware of any changes in the home circumstances which may impact on progress.
- Adaptation to ensure the development of communication, expressive (difficulty with using language to express ideas, needs or feelings) and receptive (difficulty with understanding words, sentences, or instructions) language, literacy, numeracy, minimise behaviour and emotional difficulties and promotion of appropriate interpersonal skills with other children/ young people.

- Arrangements to support the use and delivery of approaches/ materials for child/ young person who, through the use of termly tracking, show they may have literacy/ numeracy difficulties and/or Specific Learning Difficulties (SpLD) which may include multi-sensory teaching strategies, a focus on phonological awareness, motor skills programmes.
- Effective use of Information Technology (IT) equipment to support learning.
- Staff are trained and skilled in supporting child/ young person with general and specific learning difficulties, for example, those with attention, memory, processing, or problem-solving difficulties.
- Give positive praise which is relevant to the child/ young person for all attempts not just successes.
- Recording usual way of working, evidenced in APDR. Making applications for Exam Access Arrangements as required.

What might you see? (Barriers to learning)	Suggested tools for identification of need	What can help? (Strategies and provision made by settings according to the ages and stages of the child/young person)
<p>Generalised learning difficulties.</p> <p><i>A child/young person may show a slower rate of progress than their peers. This could be due to a range of factors including developmental delay or the impact of life events. Often their rate of progress will increase over time with high quality teaching and class support.</i></p>	<p>It is important to check hearing and vision prior to consideration of or assessment for cognition and learning barriers.</p> <p>Standardised whole school progress measures</p>	<p>Universal</p> <ul style="list-style-type: none"> • Assessment through teaching to identify the areas of need in consultation with the child/ young person. • Clear and simple instructions, breaking down longer instructions and giving one at a time. • Visual schedules help child/ young person to follow the structure of the day and learn common sequences e.g. changing for PE or ready for home time. • Visual cues and prompts. • Social Stories. • Now/next /then systems close to the child/ young person. • An electronic timer/sand timer can be helpful to use as an aid to extend concentration. • Give time before a response is needed, e.g. 10 second rule. • Active learning, concrete, pictorial and pragmatic approach to learning. Emphasis on self-actualisation - activities designed to develop skills which will support them to become independent learners. • Provide an opportunity for child/ young person to use a movement break inside of the classroom for those who may not be able to attend for longer periods. • Support to manage self-esteem - celebration of strengths, reinforcement of success. • Shared next steps - so they know what to expect. <p>Targeted provision</p> <ul style="list-style-type: none"> • Provide an opportunity for child/ young person to use a movement break outside of the classroom for those who may not be able to attend for longer periods.

		<ul style="list-style-type: none"> • Pre-teaching - e.g. staff to help prepare the child/ young person for a new topic by going through the vocabulary and concepts. Repetition of taught topics and reminders to refer to. • Work trays (e.g. green as start and red as finished) help to focus on short task and brings a clear structure to activities. Start with one task and increase over time. • Consider the engagement of the child/ young person, could the learning have more of a focus on their interests. • Adapted resources and lessons so that learning is embedded at the child's/young person's pace and level of development so that it is relevant to their age and ensure all steps of development have been taught and retained.

Communication and Interaction

'Children and young people with speech, language, and communication needs (SLCN) have difficulty in communicating with others. This may be because they have difficulty saying what they want to, understanding what is being said to them or they do not understand or use social rules of communication. The profile for every child with SLCN is different and their needs may change over time. They may have difficulty with one, some or all of the different aspects of speech, language, or social communication at different times of their lives. Children and young people with ... Autism, are likely to have particular difficulties with social interaction. They may also experience difficulties with language, communication, and imagination, which can impact on how they relate to others.' SEND Code of Practice, 6.28. and 6.29.

Autism, social communication, speech, language, and communication need is often called a 'hidden difficulty.' This means that instead of communication difficulties people may see child/ young person struggling to learn to read, showing poor behaviour, having difficulties learning or socialising with others. Some children/ young people may become withdrawn or isolated. Their needs are often misinterpreted, misdiagnosed, or missed altogether.

General approaches and strategies for Communication and Interaction

- Relevant staff awareness and understanding of specific child/young person communication and interaction needs. Whole setting staff could have understanding of the different forms of communication and interaction needs. Schools can utilise support from AATS, SALT and other appropriate training bodies.
- Child/ young person will access strategies and resources typically available in the ordinary learning environment, with an emphasis on appropriate multi-sensory teaching aids to support learning and social activities.
- Tasks may need to be adapted for the individual, by level / outcome / pitch / pace and grouping. Aspects of structured teaching might be helpful.
- Staff are skilled in adjusting the pace and order of activities to maintain interest and attention.
- All staff are skilled in differentiating their language and adapting their use of non-verbal communication according to individual need.
- Empowering child/ young person through the voice of person-centred practices.
- Recording usual way of working, evidenced in APDR. Making applications for Exam Access Arrangements as required.

What might you see? (Barriers to learning)	Suggested tools for identification of need	What can help? (Strategies and provision made by settings according to the ages and stages of the child/young person)
<p>Expressive language or a speech production difficulty to communicate needs and wants</p> <p><i>The child/ young person may:</i></p> <ul style="list-style-type: none"> • have a limited range of vocabulary 	<p>Universally Speaking Checklist 5-11yrs, left hand column</p> <p>Universally Speaking 11-18</p>	<p>Universal</p> <ul style="list-style-type: none"> • Modelling developmentally appropriate language. • All attempts to communicate and speak are encouraged. • Allow time for child/ young person to process and respond (10 second rule). • Introduce a variety of language through rhymes, songs, drama. • Acknowledge and validate all forms of communication (e.g. non-verbal and spoken) and avoid correction to promote motivation for talking and self-esteem. • Providing additional alternative augmentative communication techniques. No-tech options include:

<ul style="list-style-type: none"> • use shorter, more simple sentence structure • only talk about the here and now, rather than things in the past or future • use simpler forms of words e.g. 'geen' • instead of 'green' • swap some sounds e.g. 'bish' instead of 'fish' • have difficulty responding to the whole of a sentence 		<ul style="list-style-type: none"> ○ Gestures and facial expressions ○ Writing ○ Drawing ○ Spelling words by point to letters ○ Point to photos, pictures or written words <ul style="list-style-type: none"> • Reducing pressure to speak by providing alternative means of expression (e.g. laptop, whiteboards, use of symbol communication). • Communication friendly classroom. <p>Targeted provision</p> <ul style="list-style-type: none"> • Providing additional alternative augmentative communication techniques. High-tech options include: <ul style="list-style-type: none"> ○ Using an app on an iPad or tablet to communicate ○ Using a computer with a "voice," sometimes called a speech-generating device • Small group or individual language sessions and / or language sessions (e.g. expressive vocabulary and social skills). • Language programme devised by a Speech and Language Therapist (SALT) in line with service policies and protocols. Social, Emotional and Mental Health

'Children and young people may experience a wide range of social and emotional difficulties which manifest themselves in many ways. These may include becoming withdrawn or isolated, as well as displaying challenging, disruptive, or disturbing behaviour. These behaviours may reflect underlying mental health difficulties such as anxiety or depression, self-harming, substance misuse, eating disorders or physical symptoms that are medically unexplained. Other children and young people may have disorders such as attention deficit disorder, attention deficit hyperactive disorder or attachment disorder. Schools and colleges should have clear processes to support children and young people, including how they will manage the effect of any disruptive behaviour so it does not adversely affect other pupils. The Department for Education publishes guidance on managing pupils' mental health and behaviour difficulties in schools'. [SEND Code of Practice, 6.32 and 6.33](#).

Schools have an important role to play in supporting the mental health and wellbeing of children by developing whole school approaches tailored to their particular needs, as well as considering the needs of individual pupils (p.4). There are things that schools can do for all pupils, as well as those at risk of developing mental health problems, to intervene early to create a safe and calm educational environment and strengthen resilience before serious mental health problems occur (p.5). The culture, ethos and environment of the school can have a profound influence on both pupil and staff mental wellbeing. Schools are in a unique position, as they are able to help prevent mental health problems by promoting resilience as part of an integrated, whole school approach that is tailored to the needs of their pupils. A whole school approach is one that goes beyond the teaching in the classroom to pervade all aspects of school life (p.8) [Mental health and behaviour in schools \(DfE, 2018\)](#)

General approaches and strategies for Social, Emotional and Mental Health

It is important to recognise that SEMH difficulties may reflect other underlying special educational needs or difficulties from other categories of need. Learning needs should be reviewed using settings own screening or assessment tools, or external advice to ensure that any SEMH needs or behavioural difficulties are not caused by any unmet learning need or communication difficulty. It is essential that barriers, identification tools, and strategies/provision from other areas of need outlined in this document are considered when supporting a child/ young person who presents with SEMH needs.

Due to the complex nature of SEMH needs, this section shows all possible strategies and provision that could be considered for all that may be seen. It is professional judgement and knowing your child/young person to decide which strategies will be appropriate. Not all strategies will be appropriate for all children/ young people.

- Use of whole setting approaches to promote wellbeing and resilience - consider completing whole setting audits.
- A relational policy underpinned by a clear ethos and values.
- Use of relational/restorative approaches to build, maintain and repair relationships as part of a whole school positive behaviour approach which reflects the underpinning beliefs held in e.g. therapeutic thinking, emotional coaching, restorative practice, Thrive, Virtual Schools relational practice training. Scaffolded approach into behaviour expectations.
- Encourage pupil to give their voice.
- Anti-bullying policy.
- Support available for staff working with child/ young person with SEMH via group or individual supervision or debrief sessions.
- Emphasis on giving the child/ young person choice rather than adult control and 'take up time' to respond to choose whenever possible.

- Use of distraction techniques and giving responsibility.
- Explicitly teaching de-escalation and self-management strategies.
- Use of positive language to assist children/ young people to make sense of their own feelings (e.g. using an emotion coaching approach).
- Use of PSHE, circle time and curriculum.
- Approaches to explicitly teach rules and routines, build self-esteem, and develop social and emotional skills to all children/young people.
- A good transition when the child/ young person starts a setting and between each year group/stage/setting, checking the history.
- A learning environment which is well organised and well ordered, enabling concentration and engagement.
- A wide range of sensory resources available within the environment and encouraging sensory play opportunities (play is important for all ages to support regulation).
- Reflecting on positive adult engagement and consequence environments.
- Recording usual way of working, evidenced in APDR. Making applications for Exam Access Arrangements as required.

What might you see? (Barriers to learning)	Suggested tools for identification of need	What can help? (Strategies and provision made by settings according to the ages and stages of the child/young person)
<p>Engagement with curriculum <i>The child/young person may have difficulties with:</i></p> <ul style="list-style-type: none"> • participating in class discussions • remaining in the room • starting and remaining on a task • rushing work • being able to edit and improve their work without upset • maintaining their attention • being disruptive • remembering materials or instructions, • changes in routine 	<p>Identifying pupil views is a key feature of effective practice when identifying SEMH needs. All ages.</p> <p>ABCC charts (antecedent, behaviour, consequences, and communication) – an observational tool that allows you to record information about a particular behaviour to better understand what the behaviour is communicating. All ages.</p> <p>STAR Chart (Setting, Trigger, Action, Result) - A template for analysing what happens before, during and after an episode of behaviour. All</p>	<p>Universal</p> <ul style="list-style-type: none"> • Whole setting approach to develop professional curiosity to further explore the child/ young person’s presentation – why are they withdrawn/overactive/have poor concentration? • Assessment through teaching - e.g. are there parts of the curriculum that they find easier to manage than others? Use these to develop confidence. • Have a clear structure to the day. • Establish interests and use these to engage and develop relationship. • Buddying /peer mentoring. • Use of a transition object from home to help them feel safe and secure. • Giving responsibility for looking after someone else. • WOW boards to encourage child/ young person to think about what they did well at today. • Regular communication between home and school using a variety of methods including home/school book or emails. • Give controlled choices within timetable e.g. ‘would you like to do task A or task B first?’ • Set personalised learning targets. Tasks should have clear goals, outputs, and timescales for completion to reduce the ‘unknown’ and limit anxiety. • Chunk tasks. Make tasks short, with frequent breaks, and opportunities to move around. • Use visual support to provide structure to tasks e.g. now and next board, visual timetables etc. • When/then sentences.

<ul style="list-style-type: none"> • impulsive behaviours • remaining seated • low level disruption • task transition • following adult direction <p>Change in demeanour and/or appearance (changes may have occurred quickly or over time). <i>The child/young person may have difficulties with:</i></p> <ul style="list-style-type: none"> • Change in appearance • attitude to learning, • motivation to engage with peers • quieter or louder in class • increase in stimming and/or tics • reduction in engagement with adults <p>Managing and/or regulating their emotions (e.g. quick emotional reactions to seemingly small stimuli) <i>The child/young person may have difficulties with:</i></p> <ul style="list-style-type: none"> • Anxiety /low mood • Low confidence/self esteem • Unhappy/stressed • Withdrawn • Self-harming 	<p>ages.</p> <p>Strengths and Difficulties Questionnaire (SDQ) - For identifying areas of strengths and difficulties to be completed by school, family and child and young person (CYP). Age 3—17 years.</p> <p>The Spence Children’s Anxiety Scale assess six domains of anxiety and can be used to understand whether a child/young person has raised levels of anxiety in a specific or more generalised area. Age 8—15.</p> <p>Sensory suggerter tool. All ages.</p> <p>Behaviour indicator tool. All ages.</p> <p>Psychology Toolkit CPFT NHS Trust</p> <p>Emotional Literacy Checklist— Measure child/ young person’s ability to understand and express feelings and</p>	<ul style="list-style-type: none"> • Use short, clear instructions; recap and reinforce these during lessons. • Provide ‘scaffolding’ in the form of writing frames, word mats, relevant classroom displays, access to technology. • Say what you want them to do, rather than what you do not. E.g. ‘walk slowly’ rather than ‘don’t run.’ • Consider seating and positioning in the classroom. A seat at the side or back of the classroom might be preferable for some children/young people so they do not worry about what is happening behind them. Some children/young people might prefer to be closer to the door to allow for time out if needed. • Sensory/calm box freely available. • Whole class movement breaks • Whole class calming activities (Safe calming activities) • Sensory checks throughout the day/in the moment understanding e.g. Colour Monster • Protecting and adapting playtime, maximising playtime. • Create an environment in which the learner can work; making use of flexible and multi-method learning approaches and consider alternative ways of recording to enable child/ young person to demonstrate their learning. • Understand that behaviour is a method of communication and seek what they are trying to communicate e.g. what purpose is the behaviour trying to achieve for the child/ young person? What is ‘x’ trying to tell us with their behaviour? Is there a history/context that can help us to understand behaviour? • Use of appropriate supportive language through scripts and or emotion coaching. • Keep a log and analyse pattern or trends to identify triggers. • Having a whole class ‘check in’ at the beginning/end of the school day to identify and resolve any worries. • Adapt use of voice, gesture, and body language. • Focus on reducing anxiety and thereby behaviours. • Flexible and creative use of rewards and consequences e.g. ‘catch them being good.’ • Positive reinforcement of expectations through verbal scripts and visual prompts. • Giving / allowing / agreeing to a fiddle object/self-soothing object. <p>Targeted provision</p> <ul style="list-style-type: none"> • Multi-professional approach. Liaison with school nurse and relevant health professionals as needed. • Partnership and collaboration with home is essential to understand the wider picture.
---	--	--

<ul style="list-style-type: none"> • Self-injurious behaviour – refer to Communication and Interaction section • Substance misuse • Eating disorders • Fight/ flight/ freeze/ fawn response • Emotional regulation <p>Unpredictability of behaviour with lack of obvious triggers</p> <p><i>The child/young person may have difficulties with:</i></p> <ul style="list-style-type: none"> • behaviour does not seem to follow particular patterns • triggers may seem unrelated • behaviours seem variable or change on a regular basis • behaviour at home that may not be seen at school • behaviour at school that may not be seen at home • reaction when trusted adults are not available. <p>Attendance at school (EBSA)</p> <p><i>The child/young person may have difficulties with:</i></p> <ul style="list-style-type: none"> • Reduction in attendance • being late • patterns of non-attendance • parent carers report challenges getting their child/young person into school 	<p>highlight areas for intervention. Age 7—16 years.</p> <p>The Children’s Mental Health and Psychological Wellbeing Portfolio—a range of simple, questionnaire-based assessments to measure child/ young person social and emotional skill. Age 2—20 years.</p> <p>Boxall profile— It identifies the levels of skills the child/ young person possesses to access learning. Age 4—18 years.</p> <p>Emotionally Based School Avoidance (EBSA) - tools for supporting child/young person, training for staff and guidance.</p> <p>Motional - Emotional Wellbeing & Mental Health Online</p> <p>Observing Children with Attachment Difficulties in School: A Tool for Identifying and Supporting Emotional and Social Difficulties in Children Aged 5-11</p>	<ul style="list-style-type: none"> • Staff to seek advice and support from Designated Safeguarding Lead and/or Senior Mental Health Lead in school. • Staff to be trained and aware of any child/ young person with attachment difficulties, trauma informed practice and relational approaches and how to support them. • Risk assessment if appropriate. • Sensory/calm space available • Protected and adapted playtime • A regularly updated and easily accessible one page profile created by parent carers and teaching staff, along with the child/ young person, to give a snapshot of a child/ young person likes, dislikes, strengths, and areas where they might need a bit more support. • Make reasonable adjustments to behaviour policy. • When and then plans – breaking the cycle – skill to replace unwanted behaviour – what can do instead. • Interoception plan – linked to sensory – breaking cycle. • Make specific, planned, and reasonable adjustments to behaviour policy on a case-by-case basis. • Appropriate food and fluid program to support snack and meals to meet sensory needs and nutritional level to maintain energy and focus levels. • Free access to toilets <p><i>Classroom based interventions:</i></p> <ul style="list-style-type: none"> • Provide a personalised ‘Help me’ card for the child/ young person discreetly to ask for support from an adult. • Provide a ‘Time out’ or ‘exit card’ for the child/ young person to request time away from the classroom or task when required. A clear plan should be made about where the child/ young person can go, what they could do (provide calming activities), and the plan for reintegrating them into the classroom (e.g. they may be set a time to come back, an adult may need to check on them etc) • Use a visual strategy to support communication about emotional regulation in the classroom. This could be Zones of Regulation (a book is available at cost) or the Incredible 5-point Scale (a book is available at cost) • Provide an individualised visual timetable for the task, lesson and/or across the whole school day. • Consistent classroom transition support – use music, important job, snack time either side of break, pre-warning, transition object, photos, timers, friend to move to different classroom, leaving lessons early/late to move when it is quieter. • Use a worry box in the classroom so child/ young person can express their needs safely. • Calming boards • Use a ‘keeping in mind’ strategy such as the invisible string.
--	--	--

- missing lessons
 - difficulties with transition
 - Frequent illnesses i.e. tummy ache, headache
 - Anxiety on separation and unusual dependence on family members
 - Poor sleep hygiene
 - Inappropriate friendships
- Making and maintaining healthy peer relationships and friendships**
- The child/young person may have difficulties with:*
- falling out with peers
 - not forming positive relationships
 - needing to feel in control of peer relationships
 - difficulties maintaining appropriate boundaries and relationships
 - understanding their own body signals/Interoception
 - understanding of others' emotions
 - developing relationships in unstructured times
 - physical aggression with others
 - isolated from peers
 - sensitive to disagreements
 - lacks resilience to repair the relationship
 - rejecting others

[Outcomes Star™ transforms lives and services | Triangle](#)

- Give warnings and/or preparation and allow discussion for any changes to the school day or for any school trips. Visual support might be helpful here such as pictures of any change or new place.
 - Personalise the environment, e.g. provide own workspace if this is preferable for the child/ young person.
 - Any adult in the classroom to support de-escalation in a consistent manner – consider using scripts.
 - Play based activities.
 - Using child/young person’s strengths to put in place a skills-based curriculum focus.
 - Continued use of unconditional positive regard to ensure fresh start each lesson.
- Interventions outside of the classroom (it is important to consider the right intervention to meet the needs of the child/young person for the skills you hope for them to develop; ensure an appropriate balance between outside and inside the classroom; and the interventions should have clear aims and outcomes):*
- Identify a trusted key person(s) to talk about worries and support with problem solving. Schedule a daily check in or daily meet and greet with a trusted adult. This may happen at the start of the day to discuss the day ahead, at the end of the day to review the day, or during the day to check in about how the day is going. This should be at least 15 minutes daily. They may also need to be available on an ad hoc basis for support when required during the day.
 - Identified safe adults – a small group of adults identified by the child/young person.
 - Individualised [ELSA](#) (Emotional Literacy Support Assistant) Intervention which teaches specific emotional regulation and/or social skills.
 - Small group interventions aimed at developing social skills or communication such as: [Talkabout](#), [socially speaking](#), [Time to talk](#), [construction club](#)
 - Direct teaching of calming/self-regulation strategies (visualisations, meditation, breathing).
 - Social stories/ social scripts/ comic strip conversations/ therapeutic stories.
 - A time to discuss and explicitly label emotions.
 - [Circle of Friends Intervention](#) aimed at developing understanding and collaboration within a class or peer group.
 - [Nurture Group Provision](#).
 - Providing structure during unstructured times.
 - Outdoor interventions such as weekly gardening, forest school, sports.
 - Provide appropriate play-based activities and/or creative activities e.g. messy play, using playdough, drumming, music, drama, art. This should be at least once a week with a trusted adult.
 - Plan targeted opportunities to build positive relationships with the child/young person - e.g. a specific time

<ul style="list-style-type: none"> • understanding social language and phrases from others • a reduction in opportunities to play • balancing sensory input <p>Environmental factors to consider:</p> <ul style="list-style-type: none"> • body image/ self-image • sexuality • excessive social media use/ online presence/ gaming • safeguarding – CME/ CSE • inappropriate friendships • Adverse childhood experiences • Bereavement and loss 		<p>in the day/week to share an activity that is of interest to you both.</p> <ul style="list-style-type: none"> • Calming scripts to de-escalate, using activities with natural endings that support self-regulation such as word searches/mazes/ finger tracing etc. • A smaller/quieter place to eat lunch. • Flexibility around extra-curricular activities and how the child/ young person can access these.

Sensory and/ or Physical needs

'Some children and young people require special educational provision because they have a disability which prevents or hinders them from making use of the educational facilities generally provided. These difficulties can be age related and may fluctuate over time. Many children and young people with vision impairment (VI), hearing impairment (HI) or a multi-sensory impairment (MSI) will require specialist support and/or equipment to access their learning, or habilitation support. Children and young people with an MSI have a combination of vision and hearing difficulties. Information on how to provide services for deafblind children and young people is available through the Social Care for Deafblind Children and Adults guidance published by the Department of Health (see the References section under Chapter 6 for a link). Some children and young people with a physical disability (PD) require additional ongoing support and equipment to access all the opportunities available to their peers.' SEND Code of Practice, 6.34 and 6.35.

General approaches and strategies for Sensory and/ or Physical needs

- The view of the child/young person around how they feel has been sought in a child friendly way to ensure the physical school environment, communication and curriculum is accessible.

- Consider the physical school environment. Is their locker/ peg accessible and inclusive?
- Close home/setting/parent carer links/relationship (not just ICT based) so that staff are aware of any changes in home circumstances and environmental factors that might impact on progress. Also to ensure that information is shared appropriately.
- All staff are aware of individual child/ young person’s sensory /physical disability and implications in all teaching and learning environments. Staff may choose to observe the child/ young person’s journey through the day to ensure provision is accessible.
- Favourable seating arrangements are identified.
- Staff are aware that for some children/ young people, a sensory or physical disability could impact on their language and social interaction.
- Staff should ensure that child/ young person use aids and equipment to support their needs.
- Staff should ensure that all children/ young people have understood all instructions.
- Recording usual way of working, evidenced in APDR. Making applications for Exam Access Arrangements as required.
- Ensure fair access to school clubs, trips, and visits (including swimming, in and out of the pool) with forward planning and risk assessments. This would include consideration for transport and personnel.
- Accessibility plan with anticipatory consideration plans guiding this.
- A Personalised Emergency Evacuation Plan (PEEP) may be necessary for certain students with physical disability. [Personal Emergency Evacuation Plan \(PEEP\)- TheSchoolBus](#)

What might you see? (Barriers to learning)	Suggested tools for identification of need	What can help? (Strategies and provision made by settings according to the ages and stages of the child/young person)
<p>Vision impairment</p> <p><i>The child/ young person may:</i></p> <ul style="list-style-type: none"> • hold reading materials very close or at an unusual angle • adopt a poor or unusual posture when reading • not respond to non-verbal instructions such as facial expressions • lose their place when reading, skip lines or struggle to find text on a page • lack confidence in group activities • be hesitant when walking 	<p>Hold a conversation with the parent/ carer around concerns. Check when last eye check took place and whether any health professionals are involved such as a Consultant Ophthalmologist.</p> <p>Use the quick checker in this document.</p> <p>School staff are not expected to carry out any specialist assessments relevant to this area of need.</p>	<p>Universal</p> <ul style="list-style-type: none"> • Uncluttered worksheets. • Think about contrast e.g. paper and crayons, resources on a plain background that contrasts. • Enlarging of class resources e.g. larger text on worksheets. Not A3 as this is too large an area to scan for students with a vision impairment. • Use of matt laminates to reduce glare • Removing unnecessary text/pictures on worksheets, whiteboards, and presentations. • Ensuring good overall glare-free to access levels of light • Consideration of best placement of child in learning environment for seated tasks. • Provide additional resources for inclusive play, for example a bell in the ball so all can play together. • Ensure time for a child to map the room. Allow re-mapping to occur when furniture and resources change place to reduce confusion and potential injury. • Use blinds to reduce glare in the room. • Adults to ensure they do not stand with their backs to the windows when talking to the child. • For children who wear glasses, staff to ask for a spare pair to be kept at the setting if they are regularly forgotten.

<p>or bump/knock into things</p> <ul style="list-style-type: none"> • walk with an unusual gait • have difficulty finding dropped items • have a short attention span when reading or writing • tilt their head excessively to one side, up or down • use excessive head movements when reading • squint or frown when looking at the board 		<ul style="list-style-type: none"> • Close home/setting/parent carer links/relationship (not just ICT based) so that staff are aware of any changes in home circumstances and environmental factors that might impact on progress. Also to ensure that information is shared appropriately. • Joint working between school and family to discuss child/ young persons vision impairment • Curriculum adaptation that takes account of individual visual needs • Following medical advice about the wearing of glasses and/or occlusion (patching) • Accessing and using e-books e.g. RNIB Bookshare. • Awareness and risk assessment of impact of vision impairment for safety e.g. PE lessons, fire practice, offsite or unfamiliar visits. • Consider appropriate signage around the school to include braille and at accessible height of users. • Use of technology such as talking tins, iPads with the whole class. • Occupational Therapy Toolkit CPFT NHS Trust
<ul style="list-style-type: none"> • struggle to copy information from the board or from a peer next to them. • have poor hand/eye co-ordination 		<p>Targeted provision</p> <ul style="list-style-type: none"> • Staff to engage with partner agencies such as OT/ Physio/ Specialist Teachers of VI/ Deaf/ MSI/ PD professionals to be aware of and implement recommended strategies and advice to support the child/ young person. • Use RNIB Bookshare/ for electronic books /books in Braille via Specialist Teaching Service SAPS. • Use of ICT e.g. iPad connected to whiteboard. • Use recordable devices e.g., Talking Tins, penfriend via Specialist Teaching Service SAPS. • Consider doing a Request for Involvement for SAPS • Occupational Therapist 'Go to OT Guide'

What might you see? (Barriers to learning)	Suggested tools for identification of need	What can help? (Strategies and provision made by settings according to the ages and stages of the child/young person)
--	---	---

<p>Deaf</p> <p><i>The child/young person may:</i></p> <ul style="list-style-type: none"> • have immature grammar e.g. “me want apple” • have immature speech sounds e.g. “bish” for fish, • “gar” for car • make less than expected progress in phonics • make less than expected progress in the curriculum • lose focus or be more often distracted in comparison to peers • vary in response to hearing their name e.g. good if familiar voice, when close or can see you, in quiet environment • not turn their head and smile, look up, and respond verbally to name • give answers or comments which are not relevant, and show have missed information • often asks for repetition of instructions • have difficulty in starting a task after instructions (e.g. looks at other child/young person or asks for help) • use limited vocabulary, not pick up new curriculum words or names readily 	<p>Hold a conversation with the parent/ carer around concerns. Check when last hearing check took place and whether any health professionals are involved such as a Clinical Audiologist and/or Ear, Nose and Throat Consultant.</p> <p>Use the quick checker in this document.</p> <p>School staff are not expected to carry out any specialist assessments relevant to this area of need.</p>	<p>Universal</p> <ul style="list-style-type: none"> • Seated towards the front of the class so that the speaker and visual materials can be seen by the child/ young person while also being able to turn to see peers. • Instructions delivered clearly and in a normal speaking voice. • Allow additional processing time to allow comprehension of instructions or explanations. • Check the lesson content has been heard and understood, particularly when delivering new information, instructions, or homework; and/or using unfamiliar vocabulary. Ask the child/young person to explain in their own words what they have to do in the task. • Repeat contributions made by others and rephrase if necessary. • Staff understanding that a child/ young person who are deaf may supplement their communication with lip reading and visual cues to some extent. • Make sure you face the child/ young person when talking and that your face is not covered or in darkness e.g. standing in front of a bright window and putting yourself in shadow. • Stand still when talking. • Be aware that during P.E. or Games lessons it will be more difficult to follow instructions. Consider ways to include in sports at distance for example, instructions and demonstration before PE game, visual ‘flag’ to start races or alert child/ young person to stops and starts at distance. • Background noise should be kept to a minimum e.g. doors closed, carpeted floors, soft furnishing, rubber feet on the table and chair legs etc. • Seat away from any source of noise e.g. window, corridor, fan heater, projector, the centre of the classroom. • Staff support child/young person to develop independence skills e.g. the work is suitably adapted so they can work on their own with the available resources. The child/ young person is encouraged to discuss their needs. • All staff who work with a learner with deafness should be made aware how best to support in the setting and to engage with partner agencies such as OT/ Physio/ Specialist Teachers of VI/ Deaf/ MSI/ PD professionals to be aware of and implement recommended strategies and advice to support the child and consider and implement appropriate access arrangements where and when appropriate. • All adults who work with children/ young people who are deaf should have Deaf Awareness training. PSAPSS will provide this upon request. • Multisensory approach to teaching i.e. pictures and real objects, visual timetables. Use displays, visual signage to support learning and make the learning environment accessible, these can provide important visual clues for deaf children. • Use a range of communication strategies where required, for example, gesture, facial expressions, demonstration.
--	---	--

<ul style="list-style-type: none"> • use non-specific language e.g. “that one” “over there” “it is big” • have difficulty expressing needs clearly or are difficult to understand if context is unknown • use gestures, show, or point alongside speech to help them get message across • are very quiet or withdraw from group social situations • have issues with friendship group and socialising with peers 		<ul style="list-style-type: none"> • Gain the child/ young person’s attention prior to giving an instruction using a suitable visual/ physical method e.g. turning the lights on and off, tapping the child/ young person’s table to make a vibration. • School should have made provision to fulfil health and safety requirements around deafness at school e.g. regarding fire alarms and on school trips. The child/ young person may not be aware of sounds that signal danger such as traffic noises e.g. a visual action/ BSL sign for bell, which is understood by the child and used by all. • Make discrete checks that the child/ young person has understood task instructions / expectations. • Make daily checks that a child/ young person’s hearing equipment/assistive listening devices are available, working and are used effectively. • Words spoken on an audio/ visual recording may need a person to repeat what is being said, i.e. a live speaker, subtitles and scripts should be used and provided for all visual and audio media. • Occupational Therapy Toolkit CPFT NHS Trust • Glue Ear in Children and Young People
<ul style="list-style-type: none"> • have difficulty joining in playground games or age-appropriate conversation 		<p>Targeted provision</p> <ul style="list-style-type: none"> • Occupational Therapist ‘Go to OT Guide’ • Following advice/ training from Teachers of the Deaf; equipment (Soundfield and or/radioaids) should be used correctly and consistently. • A quiet working environment, particularly for specific listening work. • Conduct a risk assessment if appropriate. • Allocate watchful adult /hand holding if needed. • Consider completing a Request for Involvement for SAPS

What might you see? (Barriers to learning)	Suggested tools for identification of need	What can help? (Strategies and provision made by settings according to the ages and stages of the child/young person)
<p>Multi-Sensory Impairment: To understand the implication of deafblindness it is necessary to multiply the impact of a single vision impairment and that of deafness, not just to view it as a vision plus a hearing loss as the joint effect is greater</p>	<p>Hold a conversation with the parent/ carer around concerns. Check when last eye check took place and whether any health professionals are involved such as a Consultant Ophthalmologist.</p>	<p>Universal</p> <ul style="list-style-type: none"> • Place a priority on all the child’s sensory needs • Ensure against sensory overload • Respond to their sensory integration difficulties • A sensitive communication partner and contingent responses to all communication attempts • Support for receptive and expressive communication • Recognition of child’s preferred communication modes

<p>than the effect of hearing/visual difficulties alone.</p> <p><i>The child/ young person may:</i></p> <ul style="list-style-type: none"> • Have difficulties finding out information • Have difficulty accessing verbal and written information. • Fine motor difficulties and underdeveloped pencil/handwriting skills • be unable to access incidental learning through sight/hearing thus missing out on valuable learning and social experiences • have delayed receptive and expressive language • Have difficulties with communicating with others • Have difficulties forming and keeping friends due to misinterpreting social cues. • Have difficulty understanding/ expressing own emotional state and empathising with peers. 	<p>Hold a conversation with the parent/ carer around concerns. Check when last hearing check took place and whether any health professionals are involved such as a Clinical Audiologist and/or Ear, Nose and Throat Consultant.</p> <p>Use the quick checker in this document.</p> <p>School staff are not expected to carry out any specialist assessments relevant to this area of need.</p>	<ul style="list-style-type: none"> • Use of a concrete component e.g. objects of reference/symbols/photographs to overcome executive function difficulties • Relevant and meaningful experiences presented in context • A balance between familiar and unfamiliar activities • Regular opportunities to engage in large movements and large movement play activity • Active/supportive seating and different working positions. • Alternative recording methods made available • Sharing control with the child and supporting active involvement • Regular choice making opportunities throughout the day • Working at the child’s pace (considering burst-pause style) • A flexible approach responding to child’s changing needs/ recognition of levels of responsiveness • Not placing too many demands on the child when a ‘difficult’ day • Recognition of executive function difficulties • Clear structure and routines implemented consistently throughout the school day • Use concrete cues to support sequencing an activity, transitions, and daily routine Use of mini routines • Staff awareness of the impact of change • Consistent approach adopted by all adults • Key people with whom strong, trusting relationships are formed • Recognition of the impact of fatigue • Option to remove glasses/hearing devices when fatigued. • Extended deadlines for coursework/homework or reduce tasks/timetable (ensure still challenging) • Designated safe space to keep vision and hearing equipment • Peer awareness training • Occupational Therapy Toolkit CPFT NHS Trust <p><i>Also refer to strategies and provision for vision impairment and Deaf</i></p>
<ul style="list-style-type: none"> • Experience difficulties with self-esteem and emotional well-being. • Have difficulties moving around the environment, particularly new environments 		<p>Targeted provision</p> <ul style="list-style-type: none"> • Occupational Therapist ‘Go to OT Guide’ • Structured support to explore new environments and route planning • Assessment of hand function and fine motor activities • Activities to support development of gross motor skills and body awareness • Support to develop self-help and self-organisational skills • Structured programmes to support peer interactions

<ul style="list-style-type: none"> • Experience high levels of fatigue/stress • difficulty coping when routine and structure not established • have Sensory Integration difficulties.
